

T.Q. OIL (ATF-SEMI SYNTH)

DESCRIPTION & APPLICATIONS

T. Q. Oil is a premium quality red coloured automatic transmission fluid having low static friction properties and protection against viscosity breakdown, ensuring extended transmission life. It imparts anti-oxidation, anti-wear, dispersancy, defoaming and desired friction characteristics. T. Q. Oil has low coefficient of friction thus permitting clutch plates to engage slowly and gradually as the transmission shifts. T. Q. Oil is compatible with seal material, generally used in transmission systems. This oil is recommended for automatic transmissions, Power steering units of automobiles and light trucks and Synchromesh gear boxes.

PERFORMANCE BENIFITS

- Reduced of thickening, maintaining transmission efficiency.
- Good low temperature fluidity enabling good gear shift quality at low temperatures.
- Ensures long trouble-free life of gears, bearings and other lubricated parts.
- Protects parts against rusting even during idle period.
- Excellent Seal Compatibility.

PERFORMANCE STANDARD MEETS

- Allison C4
- Dexron II

Typical Properties

Properties	Test Method	T.Q. Oil
Colour	Visual	Red
Kinematic Viscosity @40°C, cSt.	ASTM D445	35 - 39
Kinematic Viscosity @100°C, cSt.	ASTM D445	7.2 - 7.8
Viscosity Index, Min.	ASTM D2270	170
Flash Point, (COC), °C, Min.	ASTM D92	210
Pour Point, °C.	ASTM D97	-39

*The values above are typical values. They do not constitute any contractual commitment.
Sales specifications are available on request. The present technical data sheet replaces all the previous edition.*

Health and Safety

This product is not likely to present any significant health or safety hazards when used correctly in the right application. Safety Data Sheet (SDS) is available on request through our website www.slkkruizer.com

Protect the Environment

Take used oil to an authorised collection point. Do not discharge into drains, soil or water.

Storage

Storage We recommend to store all packages under cover. In case outside storage is unavoidable, drums should be laid horizontally to avoid the possible ingress of water and damage to drum markings. Products should never be stored above 60°C, exposed to hot sun or freezing conditions.

This data sheet and the information it contains is believed to be accurate as of the date of printing. However, no warranty or representation, express or implied, is made as to its accuracy or completeness. Data provided is based on standard tests under laboratory conditions and is given as a guide only. Users are advised to ensure that they refer to the latest version of this data sheet.
